

Arc Welding Machine BX1 Series

The BX1 series welding machine is a robust and versatile arc welding power source designed for various welding applications. It features adjustable welding current and durable construction, ensuring reliable operation and consistent, high-quality welds.

Overview

Versatile Arc Welding Power Source

The BX1 series welding machine is a robust and versatile arc welding power source engineered for a wide range of welding applications. Designed with portability in mind, it features integrated wheels and a handle for easy maneuverability on the job site. This machine offers adjustable welding current, ensuring optimal performance across various electrode types and metal thicknesses, making it suitable for both professional and DIY tasks.

Technical Specifications

Current Type

AC

Welding Process

MMA, AC Arc Welding

Model Identifier

BX1-250B

Design & Build

Portability

- Integrated wheels
- Carrying handle
- Compact design

Construction

Durable construction for demanding environments
