

Armature for 110mm Circular Saws

This armature is designed for circular saws. It is compatible with models using a 110mm cutting wheel.

Product Overview

High-Performance Replacement Armature

This high-quality armature is specifically designed for 110mm circular saws, providing a reliable core component for power tool maintenance and repair. It is engineered to match the technical requirements of compatible circular saw models, ensuring efficient power transmission and motor performance. Ideal for professional repair services and industrial maintenance, this component helps extend the service life of heavy-duty cutting equipment.

Technical Specifications

Compatible Cutting Wheel Diameter

110 mm

Wheel Diameter

Compatible Tool Type

Circular Saws

Compatibility

Reference Compatibility

- 4100 Series
- 41 DONH

Applications

Power Tool Parts, Motor Components, Circular Saw Repair
