

Array Speaker with Bluetooth and USB

This array speaker is equipped with Bluetooth, USB, and aux input. It features a cooling fan and DSP sound effect.

Product Overview

Professional Array Speaker System

This high-performance array speaker is engineered for demanding audio environments, featuring a robust enclosure and a high-quality driver array. With versatile connectivity options including Bluetooth, USB, and Aux-input, it serves as a flexible solution for live performances and fixed installations. The integrated DSP sound effects and quiet cooling system ensure consistent, high-fidelity audio reproduction even during extended use.

Key Performance Metrics

Performance Highlights

900 W

Power Output

98 dB

Sensitivity

8 Ω

Impedance

Connectivity & Control

Input Interfaces

Bluetooth, USB, Aux-input, Two Ways Mix Input

Technical Specifications

Audio Parameters

Parameter	Value
Drive Unit	1.5" + 12"
Frequency Response	35Hz - 20KHz
Sensitivity Tolerance	±3 dB

Physical Design

Design Features

- Quiet Cooling Fan System
- DSP Sound Effect Processing
- Rugged Enclosure Construction
- Optimized Sound Dispersion

Logistics & Dimensions

Product Dimensions	392 x 380 x 652 mm
Package Dimensions	498 x 470 x 780 mm
Package Volume	0.183 cbm
Gross Weight	28.8 kg
