

Articulated Fume Extraction Arm

This articulated fume extraction arm captures and removes harmful fumes, dust, and smoke. Its flexible, multi-jointed arm allows for optimal positioning in industrial environments.

Overview

Industrial Fume Extraction Solution

This articulated fume extraction arm is engineered for the efficient capture and removal of harmful fumes, dust, and smoke directly at the source. Featuring a flexible, multi-jointed construction, it offers superior maneuverability and precise positioning for industrial workstations. Built for durability, it is an essential tool for maintaining air quality in environments involving welding, soldering, grinding, and chemical handling.

Design & Construction

Key Components

- Flexible multi-jointed arm
- Capture hood

Arm Construction

Flexible, multi-jointed articulated arm

Applications

Suitable Applications

Welding, Soldering, Grinding, Chemical Handling
