

Articulating Boom Lift with Telescopic Reach

This articulating boom lift is designed for reaching elevated work areas. It features a telescopic boom for extended reach and maneuverability, along with a work platform surrounded by safety rails and a four-wheel drive chassis.

Overview

High-Reach Articulating Boom Lift

This articulating boom lift is engineered for superior access to elevated work areas in challenging environments. Combining a telescopic boom for extended reach with an articulating design for maneuverability, it offers precise positioning for construction, maintenance, and installation tasks. The unit is built for stability and performance, featuring a robust four-wheel drive chassis and a diesel-powered engine.

Performance

Power Source	Diesel Engine
Drive System	Four-Wheel Drive

Design & Safety

Safety Features

- Work platform
- Safety guard rails

Terrain Suitability

Rough Terrain • Construction • Maintenance

Boom Configuration	Articulating, Telescopic
