

ASTM A563 Heavy Hex Structural Nuts

These heavy hex nuts are manufactured to meet ASTM A563 specifications. They are suitable for structural bolting applications requiring increased bearing surface.

Product Overview

ASTM A563 Heavy Hex Structural Nuts

These heavy hex structural nuts are engineered for high-strength applications, providing an increased bearing surface and wrenching area essential for structural integrity. Designed to meet ASTM A563 specifications, they are compatible with A325 and A490 bolts. Constructed from durable medium carbon steel, these nuts ensure superior tensile strength and reliability in demanding environments.

Technical Specifications

Finish Options

Plain • Black Oxidized • Zinc Plated • Hot Dip Galvanized • Dacromet

Supported Standards

- DIN
- ISO
- ANSI
- ASME
- BS
- AS
- JIS

Material	Carbon Steel, Alloy Steel
-----------------	---------------------------

Available Grades	8.8, 10.9, 12.9, Gr5, Gr8
-------------------------	---------------------------

Logistics & Supply

Monthly Supply Ability

800 tons

Supply Capacity

Delivery Time	7-30 days
----------------------	-----------

Standard Packaging	25kg per carton, 36 cartons per pallet
---------------------------	--

Applications

Common Use Cases

- Building Construction
- Instrumentation
- Automotive
- Furniture
