

Astronomical Telescope with 203mm Aperture

This astronomical telescope features a 1000mm focal length and a 203mm aperture. It is equipped with an EM10 equatorial mount and multiple eyepieces for versatile viewing.

Overview

Professional Astronomical Telescope

This precision astronomical telescope features a substantial 203mm aperture and a 1000mm focal distance, designed for high-resolution celestial observations. It includes a stable EM10 equatorial mount and a high-quality TP10 aluminium stand for steady, precise tracking. The kit is equipped with multiple oculars and an increasing lens to provide versatility for various observation needs.

Optical Specifications

Aperture	203 mm
Focal Length	1000 mm
Finder Scope	8X50

Accessories

Included Oculars

- PL4
- PL12.5
- PL25

Magnification Lens	2X
--------------------	----

Mount and Stand

Equatorial Mount	EM10
Stand Material	TP10 Aluminium
