

Asynchronous Electric Motor

This asynchronous electric motor is designed for efficient power conversion. It features a wound stator with yellow insulation and a laminated core.

Product Overview

Asynchronous Motor HD4420

The HD4420 is an asynchronous electric motor designed for reliable performance in various industrial and automotive applications. This unit features a robust laminated core and efficient stator winding, ensuring consistent operation. It is available in bulk quantities, making it a suitable choice for large-scale procurement needs.

Technical Specifications

Model Number	HD4420
Motor Type	Asynchronous

Commercial Terms

Shipping Terms	FOB
Accepted Payment Methods	L/C, D/A, D/P, T/T
Price Negotiability	Yes
Order Availability	Bulk
