

# Asynchronous Motor - YC Series

This high-performance asynchronous motor is designed for industrial applications. It features robust construction for durability and reliability in demanding environments.

## Overview

### High-Performance Asynchronous Motor

The YC series asynchronous motor is engineered for reliable and robust performance in diverse industrial settings. Available in power ratings from 370w to 2200w, this motor is suitable for a wide array of general-purpose machinery. Designed for efficiency and low-noise operation, it provides a dependable solution for pumps, fans, and compressors.

## Technical Specifications

### Power Range

**370 w**

Minimum Power

**2200 w**

Maximum Power

### Typical Applications

- Pumps
- Fans
- Compressors
- General-purpose machinery

### Available Models

YC Series, YCL Series
