

Attic and Outdoor UHF TV Antenna

This antenna is designed for receiving UHF signals, making it suitable for both attic and outdoor installations. Its structural design uses durable, weather-resistant materials for reliable performance.

Product Overview

A cost-effective solution for high-definition local channel reception.

High-Performance UHF TV Antenna

This versatile antenna is specially designed for superior reception of UHF signals, making it an ideal solution for both attic and outdoor installations. Its professional structural design utilizes strong, durable elements that are waterproof, anti-rust, and weather-resistant to ensure long-lasting performance. By capturing Full HD and digital TV signals, this antenna allows users to access free local broadcasts and significantly reduce cable or satellite expenses.

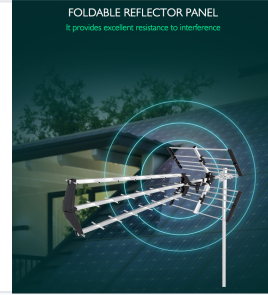

Technical Specifications

Model Number	E2169U3610N
Signal Support	Full HD, Digital TV, UHF, VHF
Installation Type	Outdoor, Attic

Key Features

Engineered for durability with waterproof and UV resistant materials.

The foldable reflector panel provides excellent resistance to interference for a clearer signal.

Core Advantages

- Long range signal reception
- Foldable reflector panel for interference resistance
- Easy installation design
- UV resistant and waterproof construction
- Anti-rust durable elements
- Extra slim packaging for efficient logistics

Physical Attributes

Detailed structural design showing the compact and professional build of the antenna.

Product Color

Black

Packaging Type
