

Attic and Outdoor VHF/UHF Antenna

This antenna is designed for VHF and UHF signal reception. Its professional structure and durable materials ensure easy installation and resistance to rust, water, and weather.

Overview

Professional Grade TV Reception

This versatile antenna is engineered for both attic and outdoor installations, providing reliable reception of Full HD and digital TV signals. Its professional-grade structure features anti-rust and weather-resistant materials, ensuring durability in various environmental conditions. Designed for efficiency, the unit includes a 4G and GSM block filter to minimize interference and ensure clear signal quality.

Technical Performance

Frequency Range

174 MHz

VHF Range Start

230 MHz

VHF Range End

470 MHz

UHF Range Start

862 MHz

UHF Range End

VSWR Performance

Band	Max VSWR
VHF	<3.5
UHF	<2.8

Impedance 75 Ω

Polarization Horizontal

UHF Beam Width 15 °

Design & Installation

Installation Benefits

- Professional structure design for easier installation
- Reduced retail pack size for freight and warehouse savings
- Solid construction for long-term reliability

Key Features Anti-rust, Waterproof, Weather Resistant, 4G/GSM Block Filter, Full HD Support

Connection Type F type
