Product Overview

High-Efficiency ATV Electric Sprayer

This high-pressure electric disinfectant sprayer is specifically designed for integration with ATVs, making it an ideal solution for large-scale agricultural and garden applications. Available in 60L and 100L tank capacities, it provides the versatility needed for efficient pesticide application, fertilization, and disinfection tasks. Built for professional use, it combines high-pressure performance with the convenience of an electric pump system.

Technical Specifications

Tank Capacity Options

- 60 Liters
- 100 Liters
