

ATV Recoil Starter Dish

This recoil starter dish is a replacement part for ATV engines. It features a durable plastic housing and a metal starter pawl mechanism for reliable engine starting.

Product Overview

Reliable Engine Starting Solution

This ATV Recoil Starter Dish is a precision-engineered replacement part designed to restore reliable starting performance to your ATV engine. Featuring a robust plastic housing combined with a durable metal starter pawl mechanism, it is built to withstand the demanding conditions of off-road environments. The integrated ribbed pulley design ensures smooth and efficient rope winding, providing consistent power for every start.

Technical Specifications

Housing Material	Durable Plastic
Starter Mechanism	Metal Starter Pawl
Pulley Design	Ribbed

Key Features

Performance Benefits

- Smooth operation
- Long-lasting durability
- Consistent starting power

Application Suitability	ATV Engines, Off-road Use, Replacement Part
