

ATV/UTV Engine Cylinder

This cylinder is designed for ATV/UTV engines. It provides a sealed chamber for the piston to move and compress the air-fuel mixture.

Product Overview

High-Performance Engine Cylinder

This ATV/UTV/Snowmobile engine cylinder features advanced Nikasil plating for superior durability and heat resistance. Engineered for optimal performance, this component delivers high power output while maintaining low fuel consumption. Designed to meet stringent environmental standards, it ensures low emissions and is fully compliant with EPA and EU2 regulations.

Technical Specifications

Plating Technology	Nikasil
Compliance Standards	EPA, EU2
