

ATV/UTV Engine Water Pump

This water pump is designed for CF500 and CF188 engines commonly found in ATVs and UTVs. It ensures efficient coolant circulation, which prevents overheating and maintains optimal engine performance.

Product Overview

High-Performance Engine Cooling

This water pump is specifically engineered for 4-stroke liquid-cooled engines, ensuring efficient coolant circulation to prevent overheating. Designed as a direct replacement part, it maintains optimal engine performance and longevity for heavy-duty off-road vehicles. It meets or exceeds standard specifications for durability and reliable operation in demanding environments.

Technical Specifications

High-quality water pump assembly designed for 4-stroke liquid-cooled engines.

Vehicle Application

- ATV (All-Terrain Vehicle)
- UTV (Utility Task Vehicle)

Compatible Engine Models

CF500, CF188, 4-Stroke, Liquid Cooled

Cooling System Type

Liquid Cooled

Performance & Quality

Installation

Direct Replacement • Easy Installation

Quality Standard

Meets or exceeds OEM specifications

Primary Function

Coolant circulation and heat dissipation
