

ATX and Micro-ATX PC Case

This computer case is constructed from SPCC material and supports ATX and Micro-ATX motherboards. It features multiple drive bays and optional fan configurations.

Overview

K2 Series PC Case

The K2 Series PC case is a versatile chassis designed for ATX and Micro-ATX builds, offering a robust 0.5-0.55mm SPCC steel construction. It features an optimized layout with ample space for storage, including dedicated slots for both 3.5" HDDs and 2.5" SSDs. With support for high-end CPU coolers and long graphics cards, this case provides a solid foundation for professional and gaming PC builds.
