

Audio Alert Device

This device functions as both a buzzer and a trumpet speaker. It is designed for use in audio signaling systems.

Product Overview

Professional Audio Alert Solution

This audio alert device is engineered for reliable signaling in diverse professional environments. Its robust construction ensures consistent performance and clear acoustic output for demanding industrial or commercial applications. Designed for easy integration, it serves as an essential component for safety and communication protocols.

Technical Specifications

Device Type	Audio Alert Device
Form Factor	Trumpet-style Buzzer
