

Audio Alert Device

This audio alert device produces distinct tones for signaling and notification purposes. It is suitable for integration into security systems, industrial equipment, and consumer electronics.

Product Overview

Professional Audio Alert Device

This durable audio alert device is engineered for reliable performance in demanding environments. Designed with high-quality components, it provides clear and consistent audible signals for various industrial and safety applications. Its robust construction ensures long-term stability and operational efficiency for professional use.

Technical Specifications

Device Function

Audio Alert • Buzzer

Model Identifier

613
