

Audio and Video Cable Faceplates with Keystone Cutouts

These faceplates are designed for terminating audio and video cables. They feature keystone jack cutouts for creating organized audio and video connections in structured cabling.

Product Overview

Professional Connectivity Solutions

These audio and video cable faceplates are designed to provide a clean, organized, and professional termination point for structured cabling systems. Available in both blank and multi-port configurations, they allow for flexible integration of various keystone jacks. The durable white finish ensures a seamless aesthetic in office, commercial, or residential installations.
