

# Audio Buzzer and Trumpet Speaker

This device functions as both a buzzer and a trumpet speaker. It is designed for applications requiring audio signaling and sound projection.

## Product Overview

### Audio Buzzer and Trumpet Speaker

This audio buzzer and trumpet speaker is a compact, high-precision acoustic component designed for professional integration in electronic systems. It features a robust structural design suitable for various industrial alarm or signaling applications. With integrated mounting points, this component provides engineers with flexible installation options while maintaining a small footprint.

## Technical Dimensions

### Structural Measurements

Dimension Type	Value
Total Height	51.5
Width (Side View)	18.5
Base/Width Reference A	17
Base/Width Reference B	28
Base/Width Reference C	23.6
Base/Width Reference D	29
Mounting Hole Diameter	3.2 units
Number of Mounting Holes	3

## Certifications and Compliance

Compliance and Usage	Industrial, Engineering-Grade, Alarm-Ready
