

Audio Buzzer and Trumpet Speaker

This audio device combines a buzzer and a trumpet speaker into one unit. It is suitable for use in electronic applications requiring sound output.

Product Overview

High-Performance Industrial Acoustic Components

This product suite includes an integrated audio buzzer and a robust trumpet speaker, engineered for reliable sound output in professional environments. Designed with high-durability materials, these components provide clear, consistent signaling performance. Their versatile build makes them suitable for various industrial alarm and notification systems where audio precision is essential.

Technical Specifications

Primary Applications

- Industrial Alarm Systems
- Notification Equipment
- Exhaust System Signaling

Included Components

Audio Buzzer, Trumpet Speaker

Mounting Type

Flange-mounted

Construction Material

Industrial Metallic Alloy
