

Audio Buzzer and Trumpet Speaker

This audio device combines buzzer and trumpet functionalities. It is suitable for use in electronic devices, alarms, and communication systems.

Product Overview

Versatile Audio Solutions

This audio equipment range encompasses both high-frequency buzzer systems and trumpet-style speakers, catering to diverse signaling and amplification needs. Engineered for robust performance, these units are suitable for industrial alerts, public announcement systems, and complex acoustic environments. Their flexible design ensures seamless integration into both modern professional facilities and traditional auditorium architectures.

Technical Specifications

Compatibility

- Industrial Signaling
- Public Address Systems
- Conference Halls
- Auditorium Audio

Included Components

Audio Buzzer, Trumpet Speaker
