

# Audio Component Set with Speakers, Trumpet, and Buzzer

This set features a range of audio components including round and oval speakers, a tweeter, and a buzzer. It also includes a crossover network for managing audio frequencies.

## Product Overview

### Comprehensive Audio Solution

This audio component set provides a versatile selection of high-performance components designed for clear and reliable sound reproduction. The collection includes a round speaker with a protective grill, an oval speaker with an integrated tweeter, a dedicated small tweeter, and a precision crossover network. Housed in a durable, clear casing, the crossover allows for easy inspection of its internal electrical components, ensuring high build quality for professional audio setups.
