

Audio Components: Speaker, Trumpet Speaker, and Buzzer Set

This set includes a standard speaker, a trumpet speaker, and a buzzer. These audio components are suitable for sound reproduction, signaling, or alerting applications.

Product Overview

Audio Component Versatility

This audio component set offers a comprehensive solution for sound reproduction and electronic signaling needs. The collection includes a standard speaker, a robust trumpet speaker, and a high-frequency buzzer, providing flexibility for various design and maintenance projects. These high-quality components are engineered for durability, featuring sturdy frames and efficient driver structures ideal for integration into electronic systems.

Component Details

Components Included

- Circular Speaker with foam suspension
- Trumpet Speaker with internal driver
- Black mesh-cased Buzzer

Technical Specifications

Primary Applications

Sound Reproduction • Signal Alerting • Electronic Device Integration

Construction Materials

Black Plastic Housing, Foam Suspension, Metal Magnet Structure, Protective Mesh
