

Audio Door Phone Kit

This audio door phone kit provides a secure way to manage property access. It features two-way communication and vandal-resistant design.

Product Overview

Reliable Audio Access Control

This audio door phone kit is designed for easy, DIY-friendly installation, making it an ideal solution for residential access management. Featuring a durable, waterproof aluminum alloy outdoor station, the system ensures clear two-way voice communication and secure electric unlocking. With support for up to two indoor stations and a working range of up to 200 meters, it provides a flexible and robust solution for various property layouts.
