

Audio Mixing Console for Food and Beverage Machinery

This audio mixing console is designed for food and beverage processing machinery applications. It offers precise audio control for various production processes in industrial environments.

Product Overview

Professional Industrial Audio Control

This professional-grade audio mixing console is specifically engineered for integration within food, beverage, and cereal processing machinery environments. It provides precise control over audio signals, ensuring reliable performance during complex production processes. With a robust design, it is built to withstand the demands of industrial settings while offering intuitive mixing capabilities.

Technical Features

Control Capabilities

- Individual channel gain control
- Dedicated EQ per channel
- Pan control for signal routing
- Smooth tactile faders
- Auxiliary sends

Monitoring

Comprehensive Monitoring, Industrial Grade, Multi-Channel Input

Application

Primary Applications

Food Processing • Beverage Production • Cereal Processing
