

Audio Power Amplifier

This high-performance power amplifier is designed for audio applications. It delivers clear and powerful sound reproduction with minimal distortion and includes a crossover network and tweeter.

Overview

High-Performance Audio Amplification

This high-performance power amplifier is engineered for superior audio signal amplification, ensuring clear and powerful sound reproduction with minimal distortion. Built with robust construction and advanced circuitry, it is a versatile solution suitable for home theater systems, professional audio setups, and automotive sound environments. The unit includes an integrated crossover network and tweeter for enhanced frequency management.

Technical Specifications

Speaker Configuration	2-Way
Mid-Range Driver Size	6.5 inch

Features

Key Features	Robust Construction, Advanced Circuitry, Crossover Network Included, Tweeter Included
--------------	---

Application

Primary Applications

- Home Theater Systems
- Professional Audio Setups
- Automotive Sound Systems
