

Audio Video Cable for Signal Transmission

This video cable is designed for reliable signal transmission. It features durable construction and shielded conductors to minimize interference, making it suitable for various audio-video applications.

Product Overview

Professional Signal Transmission

This high-quality audio video cable is engineered to ensure reliable signal transmission across a wide variety of professional audiovisual applications. Featuring durable construction and integrated shielding, the cable effectively minimizes signal interference to maintain signal integrity. It provides a robust solution for environments requiring consistent and clear connectivity.

Technical Features

Performance Quality

High Quality • Interference Shielded

Construction

Shielded conductors

Applications

Audio, Video, Signal Transmission
