

Audio-Video Distribution Amplifier with RCA Connectors

This audio-video distribution amplifier splits and distributes audio and video signals. It features RCA input and output connectors for composite video and stereo audio, ensuring compatibility with various devices.

Overview

Professional Audio-Video Distribution

The AV-A104 is a versatile audio-video distribution amplifier engineered for splitting and distributing signals to multiple destinations. Designed to maintain signal integrity over longer cable runs, it effectively minimizes degradation to ensure optimal quality for both audio and video. This reliable solution is ideal for diverse applications, including home theater setups, professional presentation systems, and surveillance monitoring.

Technical Specifications

Connector Type	RCA
Signal Compatibility	Composite Video, Stereo Audio

Features

Key Features

- Signal boosting for long cable runs
- Maintains signal integrity
- Minimizes signal degradation
- Multi-destination distribution

Applications

Suitable Applications

Home Theater • Presentation Systems • Surveillance
