

Auto Darkening Welding Helmet

This auto darkening welding helmet is a high-performance protective gear designed for professional welders. The helmet features advanced auto-darkening filter (ADF) technology that automatically adjusts to changing light conditions, providing optimal visibility and eye protection during welding.

Overview

Professional Welding Protection

This high-performance auto-darkening welding helmet is engineered for professional welders seeking optimal visibility and safety. Featuring advanced ADF technology, the lens automatically adjusts to changing light conditions while maintaining the highest optical class clarity. The lightweight, durable construction and adjustable headgear ensure comfort during extended use, making it an ideal choice for MIG, TIG, and stick welding applications.

Optical Performance

Optical Class	1 / 1 / 1 / 1
Lens Technology	High Resolution

Control & Features

Interface	Digital Display Control
Operating Modes	3
Memory Function	Yes

Applications & Compatibility

Compatible Welding Types	MIG, TIG, Stick Welding
--------------------------	-------------------------

Design & Comfort

Key Design Features

- Lightweight construction
- Wide viewing area
- Adjustable headgear
