

Auto-Darkening Welding Helmet

Welding helmet designed for eye and face protection from spark, spatter, and harmful radiation. It features an adjustable headgear and an auto-darkening filter for optimal visibility and safety during welding and grinding.

Product Overview

Professional Protection

This auto-darkening welding helmet is designed to provide comprehensive eye and face protection against sparks, spatter, and harmful radiation. It features an advanced auto-darkening filter that reacts instantly when an arc is struck for optimal visibility. Constructed with high-durability materials, the helmet ensures safety and comfort during intensive welding and grinding applications.

Technical Specifications

Key Features

- Auto-darkening filter (ADF) technology
- Impact-resistant construction
- Adjustable ergonomic headgear
- Full face and eye coverage

Protection Modes

Welding, Grinding
