

# Auto-Darkening Welding Helmet

This auto-darkening welding helmet is designed to protect the eyes and face from sparks, spatter, and harmful radiation during welding and grinding processes. It features an auto-darkening filter (ADF) that automatically darkens the lens when an arc is struck, providing instant protection.

## Product Overview

### Professional Auto-Darkening Welding Helmet

This high-performance auto-darkening welding helmet is engineered to provide superior protection against sparks, spatter, and harmful radiation. Featuring an advanced auto-darkening filter (ADF), it ensures instant lens darkening upon arc detection for maximum safety. Designed for comfort and durability, the lightweight, impact-resistant construction makes it ideal for prolonged use in demanding welding environments.

## Technical Specifications

### Safety Coverage

UV Protection • IR Protection • Impact Resistant

### Adjustable Settings

- Sensitivity adjustment
- Delay time control
- Headgear fit adjustment

### Supported Processes

MIG, TIG, Stick Welding

### Material

Durable, impact-resistant composite
