

Auto Darkening Welding Helmet

This welding helmet is designed for professional use, offering superior eye protection during welding. The auto-darkening filter automatically darkens the lens upon arc strike.

Overview

Professional Auto-Darkening Welding Helmet

This high-performance welding helmet is engineered for professional-grade protection and optical clarity. Featuring advanced lens technology with a 1/1/1/1 optical class rating, it ensures superior visibility and eye safety during arc welding. The helmet includes a digital display control system with three distinct modes and a memory function for consistent, efficient operation.
