

Auto-Darkening Welding Helmet

This welding helmet is designed to protect the eyes and face from sparks and radiation during welding. Its dark lens automatically adjusts upon striking an arc, ensuring optimal visibility and safety.

Product Overview

Professional Protection

This auto-darkening welding helmet is engineered to provide essential protection for the eyes and face against sparks, spatter, and harmful radiation. It features a responsive lens that automatically darkens upon striking an arc, ensuring optimal visibility and safety throughout the welding process. Constructed from durable, heat-resistant materials, it offers both reliability and a comfortable, adjustable fit for professional use.

Technical Specifications

Key Safety Features

Auto-Darkening Lens • Heat-Resistant • Radiation Protection

Design & Comfort

- Adjustable fit
- Durable construction
- Spatter protection

Compatible Applications

MIG, TIG, Arc Welding
