

Auto-Darkening Welding Helmet

The auto-darkening welding helmet protects the eyes and face from sparks, spatter, and harmful radiation during welding and grinding. It features an auto-darkening filter (ADF) that automatically darkens the lens when an arc is struck, providing instant protection.

Product Overview

Professional Protection

This auto-darkening welding helmet is engineered to provide comprehensive protection for eyes and face against sparks, spatter, and harmful radiation during welding and grinding. Equipped with an advanced auto-darkening filter (ADF), the lens reacts instantly when an arc is struck, ensuring seamless safety. Designed for durability and comfort, the impact-resistant construction makes it a reliable choice for demanding professional work environments.

Technical Features

ADF Adjustments

- Adjustable Sensitivity
- Adjustable Delay

Compatible Processes

MIG, TIG, Arc Welding, Grinding

Design & Construction

Key Features

Lightweight • Adjustable Fit • Auto-Darkening

Material

Impact-resistant polymer
