Overview

Professional Welding Protection

This professional-grade welding helmet is engineered for optimal eye protection and operator comfort during intensive welding tasks. It features an advanced auto-darkening filter (ADF) that reacts instantly upon arc strike, shielding the user from harmful radiation and intense light. Designed with impact-resistant materials and adjustable headgear, it ensures durability and a secure fit for extended professional use.

Technical Specifications

Compatible Processes

- MIG
- TIG
- Arc Welding

Adjustable Settings

- Sensitivity
- Delay Settings

Power Supply

Solar Powered, Battery Assist
