

Auto-Darkening Welding Helmet

This welding helmet is engineered to provide optimal eye and face protection during welding. Its auto-darkening filter automatically darkens upon striking an arc, shielding the welder's eyes from radiation and intense light.

Product Overview

Professional Welding Protection

The G1190ST welding helmet is engineered to provide optimal eye and face protection during demanding welding operations. Featuring advanced auto-darkening filter (ADF) technology, the lens instantly adjusts upon arc strike to shield the user from harmful radiation. Constructed from durable, impact-resistant materials, this helmet is built to withstand harsh industrial working conditions while ensuring long-term reliability.

Technical Specifications

Safety Standards

Full Coverage • Certified Safety

Compatible Processes

MIG, TIG, Arc Welding

Key Features

Helmet Capabilities

- Auto-darkening filter (ADF) technology
- Impact-resistant construction
- Adjustable headgear for secure fit
- High-intensity light protection
