

Auto Darkening Welding Helmet

This welding helmet provides optimal eye protection during welding. Its auto-darkening filter automatically adjusts to the intensity of the welding arc.

Product Overview

Professional Auto-Darkening Protection

The iMux automatic welding mask is engineered for optimal eye protection during demanding industrial welding operations. Featuring an advanced auto-darkening filter (ADF) system, it automatically adjusts to welding arc intensity to ensure clear visibility while blocking harmful radiation. The lightweight, durable design includes an adjustable headband for a secure, comfortable fit throughout long work shifts.

Technical Specifications

Compatible ADF Models

- ADF 815S
- ADF 800S
- ADF 600S

Model Identifier

TM-16

Features & Controls

ADF Capabilities

Variable Shade Settings, Sensitivity Control, Delay Control, Auto-Darkening Filter

Design & Comfort

Design Highlights

Lightweight • Adjustable Headband • Durable Construction
