Product Overview

High-Performance Automotive Illumination

This auto LED headlight is engineered for optimal lighting distribution, utilizing an advanced lens model to deliver a standard lighting pattern. It provides high brightness and a focused spotlight effect, ensuring superior visibility on the road. Designed for versatility and safety, the unit supports both high and low beam functionality for diverse driving conditions.

Technical Specifications

Key Features

- High brightness output
- Focused spotlight effect
- Enhanced visibility
- Long-lasting performance

Technology	LED
Beam Functionality	High Beam, Low Beam
Lighting Pattern	Standard

Application

Application
Automotive
