

Automated Carbonated Drink Production Line

This automated production line is designed for the manufacturing of gas-containing beverages. The system integrates filling, sealing, and labeling stations. Constructed from stainless steel, it ensures hygiene and durability with a conveyor system for continuous product flow.

Product Overview

Automated Carbonated Drink Production Line

This automated production line is engineered for the efficient manufacturing of gas-containing beverages, including carbonated drinks, fruit juices, and bean milk. The system integrates essential processes such as washing, filling, sealing, and conveying into a single continuous flow. Constructed with durable stainless steel, it ensures high standards of hygiene and operational reliability for large-scale production environments.

Technical Specifications

Production Capacity

- 2000 B/H
- 4000 B/H
- 6000 B/H

Suitable Applications

Pop-top cans • Fruit juice • Bean milk • Carbonated beverages

Process Stages

Washing, Filling, Sealing, Conveying

Construction Material

Stainless Steel
