

# Automated Carton Packing System

This automated system erects, loads, and seals cartons for streamlined packaging. It accommodates various carton sizes and product types, enhancing packaging line efficiency.

## ADDITIONAL IMAGES

## Overview

### Automated Carton Packing System

This automated carton packing system is engineered for high-speed, efficient end-of-line packaging operations. It seamlessly integrates essential modules including carton forming, product loading, and sealing into a single cohesive unit. Equipped with a programmable logic controller (PLC), the system ensures precise control and monitoring, making it a reliable solution for diverse industrial packaging needs.

## Technical Specifications

### Key Operational Features

- Carton forming
- Product loading
- Sealing
- Conveying

### System Capabilities

High-speed operation • Modular design • Adjustable parameters

### Control System

Programmable Logic Controller (PLC)

## Safety & Compliance

### Safety Features

Emergency stop buttons, Safety interlocks
