

Automated Dough Divider

This dough divider provides uniform and complete dividing of dough. Its automatic operation improves work efficiency and saves labor.

Overview

Automated Dough Divider

This automated dough divider is designed for efficient, uniform, and complete dough portioning, significantly improving kitchen work efficiency while saving on labor costs. Its reasonable design ensures convenient operation, making it an ideal solution for bakeries and food service establishments. Built for consistency, this machine handles various dough types to streamline your production workflow.

Technical Specifications

Model	MS-36
Power	0.75 kW
Weight	180 kg

Performance Metrics

Division Count	35
Dough Weight Range	30-100g
Max Dough Capacity	3600 g

Physical Dimensions

Dimensions (L*W*H)	45 * 52 * 130 cm
--------------------	------------------

Features

Key Features	Automatic Dividing, Uniform Portioning, Labor Saving, Efficient Operation
