

Automated Drinking Straw Packaging Machine

This machine is designed for high-speed, automated packaging of individual drinking straws. It efficiently handles straw feeding, wrapping, sealing, and cutting processes.

Product Overview

High-Efficiency Straw Packaging

The Single Drink Straw Automatic Packing Machine is engineered for the automated, high-speed packaging of individual drinking straws. It seamlessly integrates the feeding, wrapping, sealing, and cutting processes into a single reliable workflow. With precision sensors and an intuitive control interface, this equipment provides consistent output and adaptable settings for various straw dimensions and packaging materials.

Key Features

Process Automation

- Automated straw feeding
- Continuous wrapping process
- Precision sealing
- Accurate length cutting

Operational Highlights

High-Speed Output, Low Maintenance, Adjustable Parameters, Precision Sensors

Operational Parameters

Adjustable Settings

- Packing speed
- Sealing temperature
- Cutting length

Construction

Robust Build • User-Friendly Interface
