Product Overview

Automated Flat Surface Labeling Solution

This automated paging labeling machine is engineered for the precise application of labels onto a variety of flat products, including cartons, plastic bags, and paper cards. Featuring advanced PLC control and a user-friendly man-machine interface, it ensures consistent performance and ease of maintenance. The system offers versatile positioning adjustments for front, rear, and vertical labeling, making it an ideal solution for optimizing packaging efficiency in industries such as food, cosmetics, and logistics.

Technical Performance

Paging Speed

30 m/min

Max Paging Speed

Labeling Speed

30 m/min

Max Labeling Speed

Product Compatibility

Compatible Product Dimensions

Dimension	Range
Thickness	0.2 - 5 mm
Width	70 - 400 mm
Length	70 - 600 mm

Label Specifications

Label Roll Requirements

- Inner paper roll diameter: 76 mm
- Outer paper roll diameter: < 360 mm
- Bottom paper width: 20 - 130 mm

Operational Features

Control Interface

PLC Control • Man-Machine Interface

Labeling Positions	Front, Rear, Up, Down
Entrance Stacking Height	100 mm
