Product Overview

High Performance Automated Cleaning

This automated floor cleaning robot delivers a high performance-to-cost ratio, making it an ideal solution for efficient surface maintenance. Featuring powerful 1500Pa suction, it effectively captures dust and debris from hardwood, tile, and carpeted floors. Its ultra-low noise operation and intelligent autonomous navigation ensure thorough coverage while maintaining a quiet environment.

Performance Specifications

Suction Power

1500 Pa

Surging Suction

Operating Noise

Ultra low

Design & Features

Build Characteristics

- Circular profile
- Low-profile chassis for under-furniture access
- Integrated edge-sweeping brushes

Key Features

Obstacle Avoidance, Drop-sensing Technology, Self-charging, Programmable Scheduling, Multi-floor compatibility
