Product Overview

Automated Floor Cleaning Solution

This automated floor cleaning robot offers an efficient and compact solution for dust and debris removal in professional environments. Featuring four distinct walking modes, including spiral and along-wall patterns, it adapts seamlessly to various floor types and layouts. With a low-profile design and integrated anti-drop and anti-collision sensors, it provides reliable, autonomous operation for daily maintenance.

Technical Specifications

Suction Force

500 Pa

Suction Power

Rated Power	17 W
Battery Capacity	800 mAh
Charging Time	4 h
Cleaning Duration	60 min
Operating Noise	65 dB

Physical Dimensions

Unit and Packaging Size

Item	Dimensions (mm)
Body Size	270 x 76
Carton Size	320 x 118 x 367

Performance Features

Safety Sensors

- Three anti-drop sensors
- Mechanical anti-collision system

Walking Modes

Random, Spiral, Along Wall, Zig-zag
