

Automated Floor Cleaning Robot Vacuum

This vacuum robot is designed for automated floor cleaning. It operates on an input voltage of 100-240V and outputs 24DC.

Product Overview

Efficiency in Automated Cleaning

The TA-240 is a high-performance automated floor cleaning robot designed to streamline maintenance tasks in professional and residential environments. With a balanced charging cycle and long-lasting battery capacity, it ensures consistent floor coverage. Its compact design allows it to navigate tight spaces effectively while maintaining a reliable dust collection capacity.

Technical Specifications

Input Voltage	100-240V
Output Voltage	24 V
Charge Time	5 hours
Working Time	100-120 minutes
Battery Capacity	2200 mA
Dust Container Capacity	0.37 L

Physical Dimensions

Dimensions (Diameter x Height)	32 x 8.7 cm
