Overview

Professional Automated Floor Cleaning Solution

This high-end automated floor cleaning robot utilizes advanced LDS laser and SLAM navigation technology to ensure comprehensive, systematic coverage without missed spots. It offers versatile cleaning performance through combined sweeping and mopping capabilities, tailored by intelligent app control and virtual boundary settings. With a powerful brushless motor and an extended-capacity battery, this unit provides reliable, autonomous maintenance for various commercial and residential floor environments.

Technical Specifications

Suction Power

2000 Pa

Suction Power

Battery Performance

6400 mAh

Battery Capacity

240 min

Cleaning Time
