

Automated Hydraulic Metal Shear

This hydraulic metal shear is engineered for precise and efficient metal cutting. It features a robust frame, advanced hydraulic system, and integrated conveyor system for automated material handling.

Overview

High-Performance Automated Hydraulic Metal Shear

The HGS160/13 Hydraulic Shear is engineered for precision and reliability in demanding industrial environments. Featuring an advanced hydraulic and electric system, this machine is suitable for a wide range of applications including machine-building, automotive, container manufacturing, and electric cabinet production. It is capable of processing various metal types, including low-alloy steel, stainless steel, and spring steel, ensuring versatility for high-volume production needs.

Technical Specifications

Industry Applications

- Machine-building
- Automotive
- Container manufacturing
- Electric cabinet production
- Light industries

Model Number	HGS160/13
Compatible Materials	Low-alloy steel, Stainless steel, Spring steel

Features

System Features

Advanced Hydraulic System • Electric Control System • Automated Material Handling • User-Friendly Interface
