Overview

Automated Ice Cream Vending Solution

This automated vending machine offers a seamless, self-service solution for dispensing ice cream cones. Designed for commercial indoor settings, it features an intuitive touchscreen interface for product selection and integrated payment processing via coin or QR code. The unit includes a refrigerated compartment to ensure optimal product temperature and quality, providing a hygienic and efficient experience for customers.

Operational Process

How it Works

- Place the cone into the designated cup holder
- Complete payment via coin slot or QR code scan
- Machine automatically prepares the ice cream
- Remove the finished ice cream cone for immediate enjoyment
